Deal-enabling, value-protecting solutions for corporate transactions

Over the last decade, Transactional Risks (TR) insurance products have become essential tools for dealmakers. TR is now a well-established, multi-billion dollar, dynamic, international insurance class. TR products help to preserve asset value, and unblock difficult, high stakes negotiations. They are increasingly low cost and user-friendly. The claims data is compelling – TR insurance responds when required.

Legal Contingent Risk Insurance (Litigation Buy-out)

When to use it:

- ☑ When you receive legal advice regarding an ambiguous law, regulation or contract, and face the possibility of an adverse outcome in court or arbitration.
- ☑ The product can be used for hypothetical, threatened or active litigation/arbitration.
- ☑ It is often a good solution for complex legal risks, with no natural home in other insurance lines.

What it covers:

- ☑ The worst-case financial consequences of a future adverse court decision or arbitration award.

Common applications:

- ☑ Judicial reviews / permit challenges
- ☑ Contract disputes
- ☑ Regulatory uncertainty

Key benefits:

- Manage contingent legal risks holding up the release of funds.
- A solution to appease stakeholders with a low tolerance for risk, such as lenders, in-house counsel, and investment committees, so that they can get comfortable green lighting a project.
- Can be used to 'bank' a favourable judgment that may be overturned on appeal.
